Data Request No. 9

In response to comments provided by Thomas Zagami regarding the property owned by MFS, Inc., provide information on how Transco would address the concerns regarding the development of the property.

Response:

Transco has evaluated the plans filed with Lebanon County for the proposed changes to SR 0422 (Clear Springs Road) and the relocation of Killinger Road. Transco is evaluating a minor route deviation that would move the pipeline outside of the proposed Killinger Road relocation.

According to their website (easternlandpa.com), MFS, Inc. has obtained a NPDES Permit for a Signal Light and a Highway Occupancy Permit to expand and realign Killinger Road with Clear Springs Road. Transco has reached out to MFS, Inc. on several occasions to discuss the development planned for this property. To date, MFS, Inc. has not provided the detailed plans referenced in the comments filed with FERC on July 8, 2015. Transco is unable to fully address concerns regarding development without detailed plans. However, Transco is willing to discuss plans and work with MFS, Inc. to minimize potential impacts on the planned development.
