

ATLANTIC SUNRISE PROJECT

UPDATE /// SUMMER 2015

STEWARDSHIP PROGRAM PROVIDES \$2.5 MILLION TO SUPPORT CONSERVATION PROJECTS

17 PROJECTS

- 8 AQUATIC RESTORATION**
- 6 NUTRIENT REDUCTION**
- 3 TRAIL PROJECTS**

WILL RESULT IN:

10 MILES OF STREAM FRONTAGE RESTORED

30 ACRES OF RIPARIAN AREA RESTORED

8 MILES OF NEW TRAILS INSTALLED

200,000 TRAIL USERS TO BENEFIT ANNUALLY

925 TONS OF MANURE STORED ANNUALLY

► **Projects that will restore wildlife habitat** along streams, prevent harmful nutrients from entering waterways and add new nature trails were among the 17 local conservation projects that will receive more than \$2.5 million in funding through the Atlantic Sunrise Environmental Stewardship Program.

The Conservation Fund, a national nonprofit dedicated to finding conservation solutions that balance environmental and economic needs, partnered with Williams to identify the resources most in need of enhancement and/or protection in the project area. As a result, 48 proposals were received from eight counties for aquatic restoration, nutrient reduction and trail projects.

The Atlantic Sunrise Environmental Stewardship Program is a voluntary program designed to benefit the resources and support communities within the Atlantic Sunrise project area. It is not designed to replace traditional compensatory mitigation requirements of state and federal permitting agencies.

"This Environmental Stewardship Program is an exemplary model that recognizes the importance of working in a collaborative way to go above and beyond legally required mitigation to advance high value community projects." - Kris Hoellen, Vice President of Sustainable Programs for The Conservation Fund.

ATLANTIC SUNRISE REGULATORY UPDATE

On June 8, Williams filed with the Federal Energy Regulatory Commission (FERC) additional minor route changes for its Atlantic Sunrise pipeline project (Docket No. CP15-138), supplementing information to its March 31, 2015, certificate application.

FAST FACTS FROM JUNE'S SUPPLEMENTAL FILING

- ▶ Incorporated an additional 40 minor route adjustments and workspace changes affecting roughly 10% (18.68 miles) of the total greenfield pipeline project
- ▶ Increased the total greenfield mileage by 1.4 miles to a total of 183.7 miles
- ▶ Route adjustments resulted from requests from landowners, public officials and project planners
- ▶ About half of the changes had been previously identified as alternatives in the March FERC filing
- * More than 400 route adjustments have been made since it was introduced last year affecting more than 50% of the greenfield pipeline route

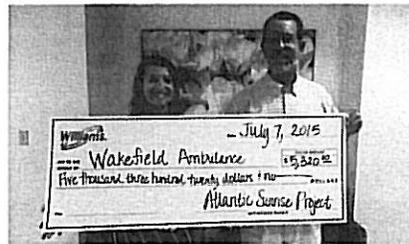

WILLIAMS ANNOUNCES \$350,000 IN ATLANTIC SUNRISE COMMUNITY GRANTS

- ▶ Grants totaling \$350,000 will be used to support 49 organizations that reside in and/or provide services to communities where the proposed Atlantic Sunrise project would be constructed and operated.

Grants up to \$10,000 per applicant will be awarded during two grant cycles each year.

"Williams has been a great partner for us, so we are thankful that they recognize the importance of community-based EMS."

- Christopher Colletti, operations chief for Wakefield Ambulance based in Peach Bottom, Pa.

The Wakefield Ambulance Association in southern Lancaster County received a grant for \$5,320 to purchase two XPS retrofit kits for their existing stretchers.

An Atlantic Sunrise community grant will support an education program at Camp Victory in Columbia County, Pa.

FIRST CYCLE GRANT SUMMARY BY COUNTY

County	Grants	Totals
Clinton	3	\$16,000
Wyoming	5	\$42,000
Schuylkill	4	\$35,300
Lycoming	3	\$18,165
Columbia	10	\$67,768
Lebanon	6	\$52,800
Luzerne	4	\$27,500
Lancaster	9	\$56,150
Susquehanna	2	\$20,000

5 REASONS TO SUPPORT PIPELINE INFRASTRUCTURE

- If you're like most Americans, you probably don't spend much time thinking about where your energy comes from. The reality is, underground pipeline infrastructure is required to feed our nation's growing appetite for reliable, affordable energy.

The Atlantic Sunrise pipeline project will connect abundant, cost-effective natural gas supplies in Pennsylvania with markets all along the East Coast, benefitting millions of American consumers.

1 Energy Independence

The production gushing from America's shale oil and gas deposits—especially the Marcellus Shale—will create **true energy independence**, but that can't happen without much needed pipeline capacity.

2 Environmental Benefits

Natural gas is the cleanest burning fossil fuel and is helping to lower U.S. greenhouse gas emissions. As additional pipeline infrastructure increases access to cost-effective gas supplies, a growing number of industries—such as electric power plants—are converting to natural gas and contributing toward the improved air quality.

3 Supports PA Jobs

Gas development has pumped tens of billions of dollars into the Keystone State's economy, supporting more than **300,000 jobs** and saving state and local governments \$19 billion in 2012-2013.

4 Local Economic Benefits

According to a study by Pennsylvania State University, the Atlantic Sunrise project could pump approximately **\$1.6 billion** into state and local economies, support up to **8,000 jobs** during the one-year construction period, and generate **\$1.9 million** in annual economic impact.

5 Access to Lower-Cost Energy

Natural gas originating in Pennsylvania's Marcellus Shale typically trades at half the cost of natural gas sourced from other North American supply basins, but without adequate pipeline infrastructure consumers won't realize the full economic advantages.

PRELIMINARY PROJECT SCHEDULE

Spring 2014 Field surveys began
 FERC pre-filing process began

Late Spring 2014 Open houses and informational meetings

Summer 2014 FERC scoping meetings

Fall 2014 Draft resource reports submitted to FERC

March 2015 7(c) application submitted to FERC

Summer 2016 Anticipated construction start

July 2017 Target in-service
